

A MESSAGE FROM YOUR IMMUNE SYSTEM

Please start
HIV treatment.
My T-cells are at 432.

Talk with your doctor about ways to help protect your immune system. HIV treatment is now recommended for everyone with a T-cell count of 500 or less and should be considered when T-cells are higher than 500, according to the DHHS* and the IAS-USA†, along with other factors. Starting treatment early may help protect your immune system and vital organs. Today's medicines may have fewer, more manageable side effects. They may help you live a longer, healthier life. Receive helpful information about living with HIV that you should know. Call toll free 1-888-497-9638, or visit TREATHIVNOW.COM.
